Placement Prep — Complete Resource List

All free resources for the Sept 2026 → March 2027 plan, organized by phase. Links are clickable. [learn first] = build the concept from scratch, [practice] = hands-on, [revision] = use only after you already understand it.

1. DSA (Phase 1 & 3)

Striver's A2Z DSA Sheet [learn first] — the most-followed structured DSA sheet, free, topic-wise
takeuforward.org/strivers-a2z-dsa-course-sheet-2

NeetCode Roadmap [learn first] — curated problems by pattern with free video explanations
neetcode.io/roadmap

Abdul Bari (YouTube) [learn first] — best free conceptual explanations for algorithms & complexity analysis
youtube.com/@abdul_bari

LeetCode [practice] — practice + company-tagged problems
leetcode.com

GeeksforGeeks [revision] — reference articles when stuck on a concept
geeksforgeeks.org

DSA Cheatsheet + Striver SDE Sheet solutions [revision] — quick-reference sheets
github.com/Krishnagangwal/CS-Fundamentals/tree/main/DSA

Git & GitHub for Beginners (freeCodeCamp) [learn first] — ~1 hr crash course, everything needed to start
youtube.com/@freecodecamp

2. CS Fundamentals — CN, OS, DBMS, OOP, System Design (Phase 1 & 3)

Computer Networks

Neso Academy — Computer Networks playlist [learn first] — builds OSI/TCP-IP, routing, TCP vs UDP, DNS, HTTP from scratch
youtube.com/@nesoacademy

CN Notes + Roadmap [revision] — written follow-up after the videos
github.com/Krishnagangwal/CS-Fundamentals/tree/main/Computer-Network

Operating Systems

Neso Academy — Operating Systems playlist [learn first] — processes/threads, scheduling, memory management, deadlocks
youtube.com/@nesoacademy

OS Notes (Parts 1 & 2) + interview Q&A [revision] — second pass + final revision
github.com/Krishnagangwal/CS-Fundamentals/tree/main/Operating-System

DBMS & SQL

Neso Academy — DBMS playlist [learn first] — normalization, transactions, indexing, ACID
youtube.com/@nesoacademy

SQLBolt [practice] — free, interactive, in-browser SQL practice
sqlbolt.com

Mode SQL Tutorial [practice] — free, in-browser, real query writing

mode.com/sql-tutorial

DBMS Notes + SQL Cheatsheet [revision] — revision layer
github.com/Krishnagangwal/CS-Fundamentals/tree/main/DBMS-and-SQL

OOP

freeCodeCamp — OOP in Python [learn first] — learn OOP in the same language as your DSA track
youtube.com/@freecodecamp

freeCodeCamp — OOP in Java [learn first] — alternative if Java is your chosen language
youtube.com/@freecodecamp

OOP Notes + interview questions [revision] — revision layer
github.com/Krishnagangwal/CS-Fundamentals/tree/main/OOPs

System Design

Gaurav Sen — System Design Basics (YouTube) [learn first] — best free beginner-friendly system design series
youtube.com/@gkcs

ByteByteGo (YouTube) [learn first] — short visual explainers per concept — caching, CDNs, etc.
youtube.com/@ByteByteGo

System Design Primer (GitHub) [learn first] — structured read-through once concepts are familiar
github.com/donnemartin/system-design-primer

System Design Cheatsheet + notes [revision] — 20-minute refresh before an interview
github.com/Krishnagangwal/CS-Fundamentals/tree/main/System-Design

3. AI Project Build (Phase 2)

Python Playlist (Divyam Dawar) [learn first] — programming fundamentals
youtube.com/playlist?list=PLKnIA16_Rmvb1RYR-iTA_hzckhdONtSW4

Generative AI Playlist (Divyam Dawar) [learn first] — LLM applications, prompting, RAG, agents
youtube.com/playlist?list=PLKnIA16_RmvaTbihpo4MtzVm4XOQa0ER0

NLP & Transformer Architecture [learn first] — self-attention, positional encoding, encoder-decoder blocks
youtu.be/3bPhDUSAUYI

Agentic AI Playlist (Divyam Dawar) [learn first] — building AI agents, tools, reasoning, orchestration
youtube.com/playlist?list=PLKnIA16_RmvYsvB8qkUQuJmJNuiCUJFPL

RAG Explained [learn first] — indexing, retrieval, augmentation, generation
youtu.be/X0btK9X0Xnk

Top 10 RAG Frameworks (Medium) [revision] — choosing a framework for the project
florinelchis.medium.com/top-10-rag-frameworks-on-github-by-stars-january-2026-e6edff1e0d91

LangGraph Course (LangChain Academy) [learn first] — free, ~6–8 hrs, official, kept current — top free pick for building agents
academy.langchain.com

LangChain for LLM Application Development (DeepLearning.AI) [learn first] — free, ~3 hrs, taught by LangChain's founder
deeplearning.ai/short-courses

Skip for now (production/senior-level, out of scope for a fresher project): LLM evaluation/LLMOps, LLM gateways, observability tooling, Forward-Deployed-Engineer roadmap, and the GCP/AWS/Azure zero-to-hero courses. Revisit only if the project is finished early.

4. Interview & Application Prep (Phase 4)

HR / Behavioral Interview Questions [revision] — common HR round Q&A
github.com/Krishnagangwal/CS-Fundamentals/blob/main/HR-Interview-Questions.pdf

LeetCode Problems (curated set) [revision] — final revision pass
github.com/Krishnagangwal/CS-Fundamentals/blob/main/LeetCode-Problems.pdf

Cover Letter Template — starting template to customize per application
github.com/Krishnagangwal/CS-Fundamentals/blob/main/Cover-Letter-Template.docx

Off-Campus Hiring Companies List — companies known to hire freshers off-campus
github.com/Krishnagangwal/CS-Fundamentals/blob/main/List-of-Companies-Hiring-Freshers-Offcampus.md

Note: the CS-Fundamentals GitHub repo is a small, community-aggregated collection (not single-authored, not heavily vetted) — treat its notes/cheatsheets as your second pass or revision layer, never the first time you meet a topic.
